

LÍNEA DE FRENOS

¿QUÉ ES?

Los **elementos de frenado** son componentes que están diseñados para **crear fricción** contra un componente **giratorio**, lo que ralentiza o detiene la **rotación de las ruedas**.

Generalmente están compuestos por **placas o cuerpos metálicos** como soporte con material de fricción adherido a la superficie que mira hacia los **discos del freno de disco o cajas de soporte de acero con material** de fricción.

¿PARA QUÉ SIRVE?

Son componentes que están **diseñados** para crear fricción contra el **disco o campana de freno**, lo que ralentiza o detiene la **rotación de las ruedas**.

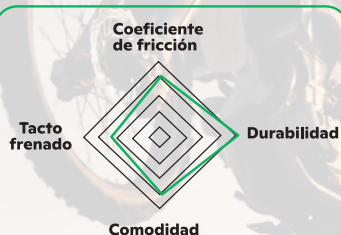

Son fundamentales para la **seguridad** y el rendimiento del **vehículo**, y es importante mantenerlas en buen estado.

Las pastillas de freno se desgastan con el tiempo y deben ser **reemplazadas** periódicamente para **garantizar** un frenado **seguro y efectivo**.

VENTAJAS COMERCIALES

CALIDAD:

Nuestros productos cuentan con **calidad** de fabricación y aplicación **DARROW**.

Material base de características similares a la **calidad OEM**.

Material **semi-metálico** que ofrece **mejor rendimiento** y una **vida útil mayor** (20% aprox comparado con la **serie metálica**).

Poder de **frenado mayor**.

Mejor comportamiento con **relación a ruido**.

Mejor apariencia (incrustaciones de cobre).

Aplicabilidad a motocicletas: scooter, motocicletas medio cilindraje (100-300cc).

Material libre de asbesto.

CATÁLOGO:

Contamos con un **catálogo con aplicaciones** para la mayoría de las **motocicletas de mercado**, tanto en **balines y rodillos** como aplicaciones.

PRECIO:

Todas nuestras **referencias** tienen un alto valor **precio/calidad** súper **competitivos** en el mercado.
